25X1 1. [redacted] Comment. Incoming shipments for the army fuel depot of the GOFG at Velten and air force depot [redacted] 25X1

25X1 2. [redacted] Comment. A plant for the production of fuel containers is located in Mittweida. The fact that containers were shipped from Mittweida to Oranienburg leads to the assumption that a small, organizational fuel depot, possibly for the KVP, is under construction there.

25X1 3. [redacted] Comment. Return of old guns to the ordnance depot in connection with the requipment with 85-mm AT guns of Soviet army units.

25X1 4. [redacted] Comment. Soviet shipments under the equipment program for the KVP.

25X1 5. [redacted] Comment. [redacted] 25X1

The mats had been delivered in 1953 for the construction of a runway of about 1,500 meters. It is believed possible that the construction of a permanent runway is planned for 1954.
